## Directions for Parents

After reading these instructions you can remove them from the sheet by carefully cutting along the dashed line above. Use only non-toxic **washable** tempera paints.

1. Carefully dip your child's fingers in the paint and then help them complete the flowers using their very own fingerprints!
2. Get creative! Your little one can use their fingerprints to make other insects, a sun or anything else you can imagine!
3. Quickly wash hands and remove paint once finished.
4. Once the paint is dry on the paper, your child can finish coloring in their creation using coloring pencils or markers.
